The large digital home for very special moments

dawawas.com is a new platform where images can be quickly and easily saved and shared online, via special Apps or even displayed on television – allowing for unforgettable memories to be securely and instantly shared with the right people at the right time. Photos of friends and family reside in the cloud and are always accessible: they can be easily uploaded via the different apps or with a laptop and then be viewed directly by Smart TV, on the computer or in the Apps.

The two founders Fabian Jager and Patrick Ohler first stumbled across the idea of a **cloud service for photos** after a skiing holiday with a large group of friends. The many snapshots taken with different cameras vanished onto various hard drives and smart phones. As so often occurs, the exchange of memory cards, DVDs or CDs or sending huge amounts of data by email did not happen and the moments were lost. An everyday problem that is solved by using dawawas.
Founders:
Fabian Jager and Patrick Ohler, founders of wer-kennt-wen.de, a German Social Network with more than nine million users

Company Headquarters:
Cologne, Germany

Launch:
February 2013

dawawas
share wonderful moments

Private from scratch

The rights of usage of photos have recently been a subject of public debates. The approach of dawawas is a different one: all rights to any images uploaded remain with the user. The dawawas philosophy is that "**your data belongs to you**".

For each event users can decide individually to whom the pictures are being made available. The default setting for each event is absolutely private – only people who are invited can see the pictures.

Security: dawawas supports encryption via SSL for all data.

DATA PRIVACY

Access always and everywhere

Apps are available for the iPhone, all Android devices, Windows 8 and for many Smart TVs.
